SELECTION METHOD

HOW PRODUCTS ARE SHORTLISTED

Three market views help separate stronger opportunities from products that need more proof.

01	ADVERTISING ACTIVITY	Looks for continued product advertising across different advertisers.
02	MARKETPLACE VISIBILITY	Checks whether a product appears meaningfully across relevant shopping platforms.
03	SEARCH INTEREST	Compares recent India search interest with the previous four weeks.

When more of these views agree, the opportunity is stronger.

WEEKLY DECISION SUMMARY

THIS WEEK AT A GLANCE

Twelve products made the manufactured shortlist. The figures below describe evidence, not sales or profit.

A balanced shortlist where evidence allowed. Real reports never add weak products simply to fill a category or reach a target count.

EVIDENCE BEFORE INTERPRETATION

HOW TO READ THIS REPORT

Three independent signal families create the market-signal label. Context, supplier leads and client compliance checks remain separate.

META ADVERTISING	Looks for sustained, relevant activity across several advertisers. A positive result requires both activity and age thresholds; a visible ad is not enough by itself.
MARKETPLACE	Looks for an approved Amazon list signal or relevant cross-platform visibility with a top-ten position. Position is evidence of visibility, not a sales count.
GOOGLE SEARCH	Compares recent and prior four-week averages. A positive result requires both the growth ratio and the absolute increase to pass.

SIGNAL LABEL

Strong means 3 positive core signals; Promising 2; Worth Watching 1; Weak 0.

WEEKLY STATUS

New, Returning, Strengthened and Weakened compare only with a comparable prior report.

QUICK COMMERCE

Nine platform-city checks provide availability and competition context only.

COVERAGE

Available tells you what could be assessed. Missing evidence is not a negative result.

COVERAGE CHANGED

Source availability changed, so no upward or downward movement is claimed.

SUPPLIER LEADS

Possible starting points for investigation; not contacted, audited, recommended or verified.

FOUR PRACTICAL PRODUCT FAMILIES

CATEGORY OVERVIEW

The sample demonstrates balanced coverage across Kitchen, Home Decor, Pet and Baby without changing the rank order created by evidence strength.

KITCHEN	**01** · Oil Spray Bottle — Strong **05** · Manual Vegetable Chopper and Slicer — Promising **11** · Clip-On Sink Strainer Basket — Worth Watching	1 Strong 1 Promising 1 Worth Watching
HOME DECOR	**02** · Rechargeable Cordless Picture Light — Strong **06** · Pleated Mushroom Table Lamp — Promising **07** · Self-Watering Plant Spike Set — Promising	1 Strong 2 Promising
PET	**03** · Motion-Activated Cat Ball — Strong **08** · Self-Cleaning Pet Grooming Brush — Promising **12** · Silicone Paw Cleaner Cup — Worth Watching	1 Strong 1 Promising 1 Worth Watching
BABY	**04** · Silicone Suction Feeding Set — Strong **09** · Stroller Organiser Bag — Promising **10** · Adjustable Baby-Proof Cabinet Lock Set — Promising	1 Strong 2 Promising

Balance is modest, not forced. The manufactured sample contains three products in each category so the client can inspect the layout. In a live report, a category may contain fewer—or no—products when the evidence does not support them.

COMPARED WITH THE LAST COMPARABLE SAMPLE WEEK

WEEKLY MOVEMENT

These statuses describe changes in report evidence. They are not sales trends, forecasts, or claims about market growth.

5	NEW	Rechargeable Cordless Picture Light · Silicone Suction Feeding Set · Self-Cleaning Pet Grooming Brush · Stroller Organiser Bag · Clip-On Sink Strainer Basket Entered this week's shortlist after passing the current evidence rules.
3	RETURNING	Motion-Activated Cat Ball · Manual Vegetable Chopper and Slicer · Self-Watering Plant Spike Set Remained at the same signal strength with comparable source coverage.
2	STRENGTHENED	Oil Spray Bottle · Pleated Mushroom Table Lamp Moved to a stronger label with comparable source coverage.
1	WEAKENED	Silicone Paw Cleaner Cup Moved to a weaker label with comparable source coverage.
1	COVERAGE CHANGED	Adjustable Baby-Proof Cabinet Lock Set Source availability changed, so no directional movement is claimed.

≠

COVERAGE CHANGE IS NOT DIRECTION

Adjustable Baby-Proof Cabinet Lock Set has two positive signals out of two available this week because search evidence is unavailable. It is labelled Coverage Changed—not Strengthened or Returning.

WHAT THIS REPORT CAN AND CANNOT SAY

COVERAGE AND LIMITATIONS

Partial coverage is shown plainly. A useful weekly report can continue with honest gaps, but it cannot turn those gaps into confidence.

12/12	12/12	11/12	50/108
Meta assessments available	Marketplace assessments available	Search assessments available	Quick-commerce presences sampled

SEARCH GAP	Rank 10 has no search assessment this week. Its two available signals are positive, but the missing family prevents a directional week-over-week claim.
QUICK COMMERCE	The 108 checks sample Blinkit, Zepto and Swiggy Instamart across Mumbai, Delhi and Bengaluru. They describe availability and competition context only.
SUPPLIER EVIDENCE	Supplier pages may be stale, redirected, blocked, incomplete or commercially unsuitable. Leads require direct client investigation before use.
NO FORECAST	The report does not estimate demand, sales, margin, conversion, return rate, landed cost, or profitability. Market signals identify products worth human investigation.
MISSING ≠ ZERO	Unavailable evidence remains Missing. It is never converted into a negative result, a zero, or evidence that a product is weak.

OPERATOR-REVIEWED DECISION SUPPORT

METHOD AND CLIENT RESPONSIBILITY

The service reduces research effort and makes evidence inspectable. Final commercial, supplier, safety and compliance decisions remain with the client.

FIVE-STEP METHOD

01 Discover and normalise candidate product concepts across the approved India categories.

02 Check Meta advertising, marketplace visibility and Google search as three separate core signal families.

03 Apply deterministic thresholds, preserve missing coverage, and rank eligible opportunities without weak filler.

04 Add quick-commerce context, lightweight client-review flags, and possible supplier leads after selection.

05 Review the checked data and regenerate both the PDF and Excel from the same source before delivery.

CLIENT RESPONSIBILITY

The client—not NeuraFlow—must:

- decide which products, if any, deserve further testing;
- verify product compliance, warnings, age guidance and claims;
- contact and assess supplier identity, stock, terms and suitability;
- sample product quality, packaging, delivery and returns;
- calculate landed cost, pricing, margin and commercial risk independently.

Supplier boundary. Possible supplier leads have not been contacted, audited, recommended or verified. They are starting points for independent investigation.

Report-use boundary. This briefing is decision support. It is not a guarantee of demand, sales, compliance, supplier suitability, product performance or profitability.
