WEEKLY DECISION SUMMARY

THIS WEEK AT A GLANCE

Twelve products made the manufactured shortlist. The figures below describe evidence, not sales or profit.

12	4	6	2	5
opportunities	Strong	Promising	Worth Watching	compliance flags

26/35 positive outcomes across available core-signal assessments. Missing coverage remains missing rather than becoming a zero.

KITCHEN	3
HOME DECOR	3
PET	3
BABY	3

A balanced shortlist where evidence allowed. Real reports never add weak products simply to fill a category or reach a target count.

EVIDENCE BEFORE CONFIDENCE

HOW OPPORTUNITIES EARN A PLACE

Three independent core signal families create the label. Coverage, context and human review keep the result understandable.

01	META ADVERTISING	Looks for sustained, relevant activity across distinct advertisers. Visible activity is a market signal, not proof of another seller's sales.	CORE SIGNAL
02	MARKETPLACES	Checks approved Amazon list evidence or relevant cross-platform visibility, with positions and source limitations preserved.	CORE SIGNAL
03	GOOGLE SEARCH	Compares recent India interest with the prior four-week period. Both proportional and absolute movement must pass.	CORE SIGNAL

STRONG
Three positive core signals

PROMISING
Two positive core signals

WORTH WATCHING
One positive core signal

MISSING STAYS MISSING
An unavailable source is never converted to zero

CONTEXT AROUND THE LABEL

Quick-commerce checks describe visible availability and competition. Possible supplier leads and lightweight client-review flags are added after selection; they do not create the market-signal label.

OPERATOR REVIEW BEFORE DELIVERY

Eligible products may be balanced modestly across approved categories, but weak products are never inserted to fill a count. A smaller honest shortlist is valid.

OUTPUT PROOF

WHAT THE PREVIEW DEMONSTRATES

The sample package shows how evidence, movement, context and responsibility are presented together without turning the report into a research dump.

Coverage honesty

Unavailable evidence remains missing rather than becoming a negative result.

Supplier starting points

Possible Indian leads retain visible price, MOQ and investigation limitations.

Client-review flags

Sensitive categories receive a lightweight reminder—not a compliance verdict.

FOUNDING-CLIENT COMMERCIAL OFFER

A SIMPLE MONTHLY PILOT

Up to 12 eligible opportunities per weekly report; fewer is valid when the evidence does not support more.

₹1,500

per monthly billing cycle

A deliberately simple founding-client offer for testing the usefulness of a repeatable weekly research service before adding software, custom modes or broader scope.

BILLING	DELIVERY	SETUP	PILOT PRICE
Monthly, paid in advance.	Four scheduled weekly PDF-and-Excel packages.	No setup fee for the founding client.	Held for the first two paid monthly cycles.

INCLUDED

- Four scheduled weekly research packages per monthly billing cycle
- One mobile-friendly portrait decision brief per delivery
- One three-sheet Excel evidence workbook per delivery
- Up to 12 eligible opportunities per weekly report
- Week-over-week movement after a comparable prior run exists
- Possible supplier leads, subject to evidence availability

NOT INCLUDED

- Guaranteed product count, demand, sales, margin, profit, or performance
- Supplier contact, negotiation, audit, recommendation, or verification
- Product compliance, certification, safety, or legal decisions
- Advertisements, creative production, media buying, or store integration
- Unlimited or custom on-demand research requests
- Software login, client portal, real-time monitoring, or daily alerts

PRICE TREATMENT

Plus legally applicable taxes, if any.

NORMAL DELIVERY ARRANGEMENT

Monday. Email delivery with a WhatsApp notification and download link.

CLEAR START · CLEAR RESPONSIBILITIES

BEGIN WITH A PAID PILOT

The goal is to test whether the weekly package improves research decisions—not to commit to a large software build before the service proves useful.

01	CONFIRM THE PILOT	Agree the founding scope, price, tax wording, preferred start date and delivery arrangement in writing.
02	PREPARE THE SERVICE	The implementation target is seven days once written scope-and-price acceptance, branding confirmation, required access, and initial service checks are complete.
03	RECEIVE AND REVIEW	Use the Monday PDF to choose what deserves investigation, then follow the evidence trail in Excel before deciding what to test.

NEURAFLOW RESPONSIBILITY

- Research and normalise candidate product concepts
- Apply the approved evidence rules consistently
- Preserve missing coverage and visible limitations
- Review and deliver the aligned PDF-and-Excel package

CLIENT RESPONSIBILITY

- Decide which products, if any, deserve further testing
- Verify product compliance, warnings, age guidance, and claims
- Contact and assess supplier identity, stock, terms, and suitability
- Sample product quality, packaging, delivery, and returns
- Calculate landed cost, pricing, margin, and commercial risk independently

Important boundary. Possible supplier leads are not contacted, audited, recommended or verified. This research supports investigation; it does not guarantee demand, compliance, supplier suitability, product performance or profitability.
